PROJECTS

- Turf Management System | MERN Stack Project**
- Built a scalable real-time turf booking platform using the MERN stack (MongoDB, Express.js, React.js, Node.js).
 - Implemented JWT-based authentication with protected API routes and role-based access control (RBAC).
 - Developed an admin dashboard with booking analytics and full CRUD operations.
 - Integrated RESTful APIs with optimized MongoDB queries to improve performance and data efficiency.
- Attendance Management System | MERN Stack Project**
- Architected a role-based attendance platform using MongoDB, Express.js, React.js, and Node.js.
 - Secured backend APIs with JWT authentication and role-based access control (RBAC).
 - Developed RESTful services with full CRUD operations for attendance data management.
 - Delivered a responsive admin dashboard with advanced search and filtering capabilities.
- CollabShare – Team Collaboration Platform | MERN Stack Project**
- Developed a full-stack team collaboration system using React, Node.js, Express, and MongoDB, implementing secure JWT-based authentication and RBAC (Team Lead / Member).
 - Integrated Cloudinary and Multer for scalable cloud file uploads with uploader tracking and permission-based deletion.
 - Built a dynamic analytics dashboard displaying team metrics (total members, files, daily uploads, activity logs) with real-time activity tracking.
